Claims 1-13 are presented for examination.

The amendments and remarks filed on February 28, 2005 have been received and entered.

Claims 1-13 are rejected under 35 U.S.C. 112 first paragraph for the reasons set forth on pages 2-5 of the office action of November 1, 2004.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant's arguments regarding the 112 first paragraph rejection are not considered to be persuasive for the following reasons. Applicant fails to provide information allowing the skilled artisan to ascertain all photosensitizer molecules being used for photodynamic therapy and all the quenching molecules being able to regulate the phototoxicity of a photosensitizer molecule without undue experimentation. In the instant case only a limited number of photosensitizer molecules and a limited number of quenching photosensitizer molecule examples are set forth, thereby failing to provide sufficient working examples. It is noted that these examples are neither exhaustive nor define the class of compounds required. The pharmaceutical art is unpredictable, requiring that each embodiment to be individually assessed for physiological activity. The instant claims read on all "effector photosensitizing molecules" being used for photodynamic therapy and all "quenching photosensitizing molecules" being used for regulating the localized phototoxicity of an effector molecule, necessitating an exhaustive search for the embodiment to practice the claimed invention without undue experimentation.

In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
